

TECHNICAL PROGRAMME of IEEE E-TEMS 2023 (HYBRID)

Digital Transformation for Smart Cities and Beyond: Projects are shaping Society

20 - 22 April 2023
Kaunas University of Technology, Lithuania

The conference is scheduled in accordance with
Eastern European Summer Time (EEST / UTC+3)

Address of the conference Venue: [Studentų st. 48 Kaunas 51367, Lithuania](#)

The **IEEE European Technology and Engineering Management Summit (IEEE E-TEMS 2023)** is addressing the challenge of achieving quality of life in **smart cities** through the projects and digital ecosystems. We must find ways to share our ideas, questions and proposals on **digital transformation** of the areas where technologies, **sustainable** smart cities and **resilient** society meet.

At **IEEE E-TEMS 2023** – hosted by the Kaunas University of Technology – participants will share their understanding of quality of life within cities, showcase their digital transformation projects and explore related themes.

The programme will be a balance between declared topics and those emergent from other submissions. For those interested in **regional perspectives**, it is important to note that we are actively seeking contributions from organizations in and around Dortmund, Bilbao, Trondheim, Kaunas, Leuven, Kyiv and other Smart Cities.

IEEE E-TEMS 2021-2025 is a conference series designed to look at critical and emergent issues through the lens of project, technology and engineering management. Over the course of the series, the European Partnership on Project & Innovation Management (EuroPIM) will bring research, practitioner and industry perspectives to emphasize the social accountability that must be associated with project management, digital transformation and smart cities. Each event will aim at delivering a hybrid conference model (with both virtual and in-person) and include international experts, educational workshops, doctoral symposia, poster sessions and dialogues amongst our EuroPIM partners. **IEEE E-TEMS 2023** is the third of the series and we sincerely welcome you to consider the details of this programme, how these insights can affect your research and project activities and how, most especially, you can see yourself contributing to future events.

We look forward to seeing you during the series!
